SUMMARY

Passionate and detail-oriented Computer Science graduate with a strong foundation in HTML, CSS, JavaScript, and modern frontend frameworks like React.js. Seeking to leverage my knowledge in responsive web design and user interface development in an entry-level Frontend Developer position. Eager to contribute to a dynamic team while continuing to grow and enhance my technical skills in a professional environment.

MINI PROJECTS

Test notify – Backend Project

- Developed an automated notification system using Node.js, Express.js, and MySQL, sending daily alerts to staff and students based on schedules.
- Integrated backend services with a REST API for seamless communication, tested using Postman.

Quiz App

- Enhanced community engagement through a user-centric web application.
- Developed responsive and user-friendly web apps using HTML, CSS and JavaScript.

Photography Website

- Created an intuitive layout for the Tint photography website using HTML, ensuring easy navigation for users.
- Improved visual appeal and responsiveness through CSS, enhancing overall user experience.
- Utilized Figma for design prototyping and collaboration, resulting in a polished and user-friendly interface.

Portfolio

- Established a clear structure for the portfolio website using HTML, effectively showcasing projects and content.
- Designed a visually engaging experience with CSS, enhancing the overall aesthetic of the site.
- Implemented JavaScript to introduce interactivity and dynamic features, boosting user engagement.
